

Good morning ladies and gentleman,

Thank you for giving me a chance to talk here.

Anyway I have been giving five minutes to talk about the value of the Rocky Creek Regeneration Project. Did you all see the advertisement which I put on the notice board beside the hall? That's the project which I want to mention here.

Long time ago, the Rocky Creek Regeneration is a very famous and well-known area. Students like us like to picnic there during holidays. But now, since the electronic technology have been developed, people nowadays have forgotten the picnic area there. Those who loves to adventure will feel so pity because the Rocky Creek Reserve is no longer used by our community and there is full of rubbish and weeds, right? So what should the young and strong teenagers like us do to make this once popular picnic area live again?

Ladies and gentleman,

To save our picnic area, ~~we~~ first we need some volunteers to help. Those who are free and have a few hours to spare over the next two weekends can consider

about it. Those who with or without partners are also invited.

We really need your help to save the area. The work we have to do are remove rubbish and weeds, plant some native trees, repair barbecue and picnic facilities so that we and our offspring can use it in the future.

The work will start each day at 10 o'clock but you are welcome to come whenever you can.

the of course, after a hard work, we'll celebrate the completion, all volunteers are invited to a free barbecue at The Rocky creek on Sunday 2nd December at 6 pm. If you have any problems or further information contact Sue on 1800 623 004.

my dear fellow students,

Besides helping other people, exercise also good for our health and ^{also built} a closer relationship with each other. please think of it deeply and check it out! Thank you.
