

Tourist destinations all over the world are ~~there~~ there because they have something to offer that another place doesn't. For that reason this is why tourist destinations have no set distribution patterns. Pacific Palms Resort located on the Mid North Coast of NSW is where it is for a particular reason. Situated 20 minutes south of Foster, Pacific Palms offers a unique holiday destination with a variety of facilities to complement this. Pacific Palms Resort is located right on the beach. The beach allows for surfing, fishing, swimming, snorkeling and just about any other activity. The resort itself provides facilities such as ^{as} a pool, tennis ~~and~~ courts, comfortable ~~and~~ 4½ star accommodation, entertainment for children and a laundry. ~~the~~

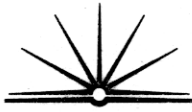

The location of such a resort ~~brings~~ brings about issues of environmental sustainability, destruction of habitats and accessibility.

The environmental sustainability of the area in which Pacific Palms Resort is located is an issue that has to be discussed before a resort is built. The environmental sustainability of the area around the resort such as the beach would need to be considered as it is one of the major features of the resort. If the ~~beauty~~ beauty of the beach was lost then the tourists who came there for that would go elsewhere for holidays.

The destruction of habitats in the construction of the resort could mean the loss of flora and fauna to the area. This could mean loss in interest of tourists who seek such attractions.

The accessibility of the Pacific Palms Resort would be a large factor in convincing people to travel to use the facilities and features of the resort. Luckily for Pacific Palms Resort its ~~location~~ location is an hour and a half north of Newcastle

makes it easy to travel to.

Pacific Palms Resort is located in a place where it can provide for tourists what they don't have at home. Pacific Palms Resort ensures its features such as the beach will be around for future generations to experience.
