

BOARD OF STUDIES NEW SOUTH WALES
a) A gile somer is a conqueter Ment
glanes dater and information. Ik note i's to
becone a gile nero information con be
accessed and somed who required by other
campules.
b) computer hand dista is redundant. It ex com
be norted out through competer KAM. To he
datebase increases the annoyance to recor he
entity will become amony amonging and in using
he met database in neme reductiont obtal hers to
be sourched through, which will become the
meting as the database increase it sie
