

BOARD OF STUDIES
NEW SOUTH WALES

a i) LCD screens are flat screens which are light like weight and can be highly portable with some computers. CRT monitors are heavy and although they look the same they are made up of different resolutions.

a ii) Path-based animation is shown and designed in separate little screens and when put together, make an animation. cell-based animation is when tiny cells are put together to make a picture, then an animation. This is more precise as the cells are smaller.

STORY BOARD.

b) i

Steve Bradbury
gold medal
100 metre
short track speed
skating

Alisa Campin
gold medal
aerial skiing
event

Jacqui Coopers
recovery from
a fall during training

speech from
Champion Steve

$$\begin{aligned} \text{ii)} \quad & 600 \text{ pixel} \times 400 \text{ pixel} \\ & = 240000 \text{ pixel} \end{aligned}$$

he can use mathematical solutions, he needs to convert the pixels into kilobytes, but for he does that each pixel need to be put into bits to estimate and convert into kilobytes.

c) Collecting the information will not be easy, but how ever successful because there are options on how the advertisement can be collected, either fax, mail or post which the newspaper companies need to be will in collecting the information for their next step.

organising The company has collected the information, there for it need to put the customers advertisements into categories to make them find it easier.

displaying The advertisements will be displayed with the costs and other information into categories and there for any one can view and access the web site for their advertisements or products.
