Question Number: **21**

b) Digital cameras, road sensors, computer to store images.

c) Pilot, as they are only testing it out and then if successful, will directly use it. Pilot is a good choice as it allows testing of the technologies, other methods of conversion will not work properly e.g. direct as it does not allow for a testing period, it converts everything to the new method period.

d) - Privacy is a major issue as people can this as a form of invasion of privacy. People have the right to ~~decide~~ ^{say no} to their images being taken.

- Also, the driver of the car may not be the one driving the car at the time and if someone other than the owner is driving the car they should be the ones fined not the owner. This also brings in the issue of whether that car is stolen or not
