Question Number: **24**

a. They may download an ~~the~~ incorrect book and would want a return or refund the selected item

Certain areas in a location may not be able to connect to the 3g wireless network meaning they will be unable to use the ~~the~~ Digibook efficiently

b. Technical - The hardware needed to produce this Digibook

Operational - Training or Personnel required to make this Digibook

~~Social ethical issues~~ ^{Schedule} - The amount of time before this will be functional

Economic - Cost efficiency

Legal and social ~~issues~~ ^{issues} - Author's copyrights

c. Digibook ~~seek~~ sends a specific code/name or current Digibook to the server

Server checks the code/name and validates it

Once connected when Digibook requests to ^{buy} a specific book another code would be sent to the server notifying of the request.

↳ The request ~~and~~ would then be validated again

The data of the book will be sent to Digibook

Meaning digibook will be "downloading" the book while the server uploads it into Digibook
