

(ii) During the German war Hitler assigned Speer's to many projects and was always ~~to~~ with him.

From 1941 to 1945 Speer was one of Germany's leading men in the sense he was controlling the Nazi movement and other things as well.

During the Nazi trials - Albert Speer said he did not take part in any Jewish mercy killing. Nor did he know of anything that was of that nature towards Jews.

But how could he have not known what had been going on he was constantly with Hitler and on "one occasion watched a killing."

He denied all these things in court.

Albert Speer's wasn't only hired to build buildings and be Hitler's Architect he was hired to be part of the Nazi propaganda.

He was in charge of things so therefore he did have knowledge of those killings, but yet denied everything when he was brought forward in court.
