

Start here.

Skin Cancer is a major health issue that has had a huge ~~it~~ impact on young people.

Skin Cancer is a type of cancer you get from the sun created by the ~~the~~ UV rays from the sun.

There are many health promotions that impact on skin cancer e.g. slip, slop, slap.

The protective factors for skin cancer are very limited.

you must wear a hat whenever your skin is exposed to the sun this provides shade to your face and neck.

you must ~~use~~ apply sunscreen when ur skin is exposed to the sun this is a lotion that you rub into ur skin to prevent sunburn.

Local communities have impled rules within there local schools these rules are "No hat, No play"

this means if you don't wear a hat there is no playtime for the child at lunch or recess.

And governments have supported many health promotions by posting advertisements on TV channels.
