## Question 15

15 A student releases a ball from eye level. The ball bounces several times.
Which velocity vs time graph best represents the ball's motion?
(A)

(B)

(C)

(D)

The table and graph show, for the groups of students whose marks in the examination corresponded to the borderline between two bands, what percentages of each group selected the responses $A, B, C$ and $D . N$ is used to identify: No valid response.
