8 7) Equality + Difference.

A.) Social class, ethnicity and Prejudice are closely ~~tied~~ tied together because the all represent some kind of disadvantage or advantage. Social class affect Power and Authority among the poor which doesn't give them as much rights as ~~those~~ those in the upper class. ~~Also~~ Money gives the upper class so much power and Authority that just by being a well known face could be a free meal ticket. As the rich get richer the poor get poorer.

∧ The rich don't pay much tax were as paying tax for the poor can be a struggle.

Ethnicity and prejudice among people ~~shows the~~ can ~~show~~ bring out their true colours with Power + Authority prejudice against a person can often make them feel small and

intimedating not giving a person great piece of mind or loss of strength and power. Ethnicity shows how power and Authority can be giving to those who are from different races and can leave some races or religions disadvantaged or advantaged for example Authority has been put in place so that Asian girls can wear turbans, to + other heavy clothing school without feeling out of place or feeling as though they need to change their beliefs or culture. This is a great example of Authority + Power showing us that some rules and regulations need to be changed for the greater good. Those from different races, background and class are often put in place and show just by the wealthier they

are, because money gives people more power + Authority over others.
