

Start here.

a) Islam began millions of years ago when the prophet Mohamed whom is the prophet whom muslims all follow was given the responsibility to teach people about Islam. Islam began growing and expanding rapidly until it reached every part of the world now. ~~It is~~ All Muslims around the world believe in one God, that Mohammed is the prophet and Gods messenger, they all read the Quran the holy book which is believed to be direct words from God and the five pillars which are praying, fasting, giving charity, going to hajj and belief in one God. These concepts have been established since the birth of Islam and are continuing on to be believed and followed.

b) The impact globalisation has had on Islam is ~~that~~ beneficial to the religion. Islam has expanded and spread rapidly all over the world, technology has been able to play a big role in the expansion of it, because it has allowed easy access available for everyone to access information on it. Muslims all around the world are able to read the Quran online or listen to it on the radio, as well as listen to lectures on the radio or internet without having to travel to another country to be able to attend it or leave your comfort zone. Also while Islam is also expanding because it is allowing other non-muslims to access information on the religion. It is allowing them to learn and find out about Islam and what its about, which also causes them to decide whether

they want to accept Islam as a religion to be a part of their lives or not. Many countries such as Australia are providing Muslims with Islamic private schools, weekend Islamic schools and Scripture lessons in public schools during the year, they are also providing them with halal meat and halal food in school canteens. By providing Muslims with so many religious acts that they can easily access more Muslims from all over the world, would want to live in that country which means the spread of Islam increases. All of this has caused Islam to becoming global.
