c) Technology has heavily impacted the way in which we participate in work & leisure. I believe that in the future technology will heavily impact in the way in which we participate in work & leisure. Modernisation has heavily impacted the way in which society works. There is an increase in office jobs & also working at home which a decade ago wasn't happening.

Work hour times went from 9-5 to around the clock in the 21st century & I believe that this trend will increase, as there has been a vast increase in 24 hour stores around Australia.

Technology has also impacted leisure. I believe leisure will continue to grow in popularity & create many jobs for society in the future. Leisure has also become a major way of gaining income as many sports persons have successfully become professional ~~from~~ sports persons & this has led to them sustaining an income from leisure activities.

Robots have been vastly used to help create cars at a much faster rate. I believe that in the future this way of mass production will be more widely used as it is a fast & effective way of mass production.
