- b) User documentation is used ^{throughout the} ~~at the stages of end of the~~ stages of the development cycle to tell the user how to use the system & the features it has. User documentation gives the user an inside of what the system does & how to operate it.
- 2) System's documentation used for the system analyst, programmer etc to give them information on the system, what it does, how to put it together, how to operate it, the features etc. It's used throughout the stages to see what the system does & how it operates.

Centre Number: Student Number:

BOARD OF STUDIES
NEW SOUTH WALES

Used to tell system workers
of how the system was
built & how to overcome
problems that occur.
