

Properties & Performance of Textiles

a) Machinery has impacted on the production of textile items in a great way.

Machinery has taken over a lot of people's jobs making it cheaper to produce an item as you don't have to employ as many people. With machinery you can ~~make a lot more~~ produce larger quantities in a lot shorter time because they are a lot faster making items than ~~the~~ what people are. Machinery can also impact a lot on people, many people have lost jobs & due to machines because they are not needed anymore as machine will save ~~the~~ a lot more money.

B) There are a lot of advances in with having Machinery & it is ~~changing the industry~~ changing the industry in a great way.

The Machines can make a larger quantity of products than it use to when people produced them, the Business will save a great deal amount of money as they no longer have to employ as many staff as they did before. The industries are changing a big way because of the machines, they can ~~now~~ now make more items, different designs & sell them to more countries.
